PROFILE

I am a self-driven Senior Pharmacist with a proven track record of spearheading impactful health supply chain management initiatives across diverse settings in Kenya, Somalia, and South Sudan.

With over 15 years of experience, I am a seasoned supply chain specialist in health program commodities, working with the Ministry of Health, international, and non-governmental humanitarian organizations.

Proficient in managing complex pharmaceutical systems, optimizing inventory, and leveraging technology for streamlined processes, I excel at training and mentoring healthcare professionals to ensure high-quality care delivery. My goal is to drive transformative advancements in program management and health supply chain management.

SKILLS

I have expertise in project management, the National HIV Integrated Training Curriculum, and pharmacovigilance and patient safety. Additionally, I am skilled in innovative teaching methodologies, global procurement and sourcing, and leadership. My technical abilities include database security and management, Excel, R and SPSS programming, HTML, JavaScript, and CSS programming, as well as data mining and analytics.

WORK HISTORY

Feb 2023 to date:

Senior Technical Advisor – Health Products USAID Stawisha Pwani Project – LVCT Health

- Supported the development of Supply Chain Strategic Plan, Pharmacovigilance Strategic Plan for Mombasa County
- Assisted four counties and 21 sub-counties, serving to a total of over 60,000 clients receiving anti-retroviral drugs and other related services.
- Provided guidance for quarterly supportive supervision of pharmacies and the implementation of corrective measures following the USAID's third-party monitoring (TPM) assessment in Kwale County.
- Strategized and synchronized annual county work plans to align with the objectives of county health product and technology units.
- Examined and crafted a set of 46 standard operating procedures for pharmacy operations across four counties in the Coastal Region of Kenya.
- Expanded the utilization of web-based ARVs Dispensing Software (webADT) from 16 to 66 health facilities.
- Conducted training sessions for 20 Ministry of Health (MOH) personnel on webADT, Kenya Health Information Software (KHIS), Kenya Electronic Medical Records, as well as data analysis and interpretation across four counties.
- Developed an Open Data Kit (ODK) application to monitor project performance and assess community pharmacy services for the decentralized drug distribution model.
- Implemented the rollout and training of 160 staff members on last-mile deliveries, reporting procedures, and health product requisition.
- Significantly decreased stock shortages of health products and technologies from 40% to below 5% within four months of project initiation.
- Launched data quality audits and enhanced data concordance in KHIS from 70% to 98%.

Nov 2021 to Sep 2022

Technical Advisor - Supply Chain Management: USAID Boresha Jamii project PATH – Kenya

- Offered technical support across four counties and 25 sub-counties, serving a total of 84,000 clients receiving anti-retroviral drugs and other essential commodities.
- Conducted four supply chain commodity technical working groups to facilitate forecasting and quantification for ART commodities on a bi-monthly basis.
- Managed the reinstallation and installation of dispensing software (web-based Anti-retroviral drugs dispensing Tool) in seventeen health facilities spanning four counties.

- Provided technical guidance in preparing monthly, quarterly, and biannual reports on supply chain and commodity management for review by the deputy chief of party, aiding in performance evaluations.
- Led pharmacy quarterly supportive supervision sessions and oversaw site preparations for site improvement monitoring systems assessments, ensuring follow-up with CHMT/SCHMT to implement recommendations.
- Orchestrated the planning and coordination of quarterly and annual county work plans to align with the objectives of county health products and technology units.
- Reviewed and redesigned pharmacy standard operating procedures and other supply chain tools to enhance efficiency and compliance.
- Made recommendations for procurement of goods, supplies, and services to fulfill supply chain objectives.
- Maintained open communication with stakeholders, authoring reports to provide up-to-date summaries of project progress.

Oct 2019 to Jul 2021

Consultant Deputy team lead: WORLD BANK MDTF SCM

- Provided assistance to the county health management team members in West Pokot County for Health Systems Strengthening as part of a two-year funding project, resulting in a 20% decrease in maternal and child mortality rates.
- Assisted in the preparation and presentation of monthly family planning dashboards for informed decision-making, leading to a 40% reduction in stockouts of 13 critical health products.
- Supported the county in quantifying health products and technologies and aligning them with the county's annual budgetary review timelines.
- Aided the county in drafting the Health Products and Technologies Unit service charter to enhance service delivery and accountability.

Jan 2018 to Sep 2019

Supply Chain Manager: JHPIEGO, USAID Afya Halisi Project

- Engaged in National and County technical working groups to review a family planning, maternal, and neonatal child health guideline.
- Took charge of data collection, analysis, and reporting on family planning commodities across 22 sub-counties spanning four counties.

- Facilitated the recruitment, training, and mentorship of 40 healthcare workers in service delivery across Migori and Kitui counties.
- Orchestrated training sessions on supply chain management and pharmacovigilance issues in collaboration with the Pharmacy & Poisons Board, Kenya, across four sub-counties, resulting in a 5% increase in identification, monitoring, and reporting.
- Coordinated the establishment and operationalization of four County Medicines and Therapeutics Committees and contributed to the development of a county drug manual.
- Conducted reviews of standard operating procedures in Migori and Kisumu counties.

Jul 2012 to Jan 2018

Supply Chain Manager: University of Maryland, School of Medicine (CDC – funded project)

- Coordinated pharmaceutical-related matters as a technical advisor on supply chain, contributing to the establishment and operationalization of County Medicines and Therapeutics Committees in Kiambu and Kirinyaga counties.
- Assisted in the collection, analysis, and reporting of patient and commodity summaries for monthly requests from over 150 facilities.
- Supported the recruitment, training, and mentorship of healthcare workers in supply chain management of ART commodities.
- Coordinated training sessions and reporting on pharmacovigilance-related issues across 34 sub-counties in Kiambu, Kirinyaga, and Nairobi City.
- Managed the implementation of the Kenya Quality Model for Health and facilitated continuous quality improvement activities in three counties.

Apr 2010 to May 2012

Mission/Regional Pharmacist: Medicins Sans Frontieres, Kenya, Sudan & Somalia Missions, Nairobi

- Provided guidance and coordination on regulatory affairs, including facilitating the application process for imports and exports of drugs, nutrition, and laboratory commodities.
- Collaborated with international pharmacists to update Kenya's Procurement Database.
- Conducted capacity-building workshops for pharmacy staff on supply chain and inventory management in both Nairobi and the North Eastern regions.

- Offered supervision and mentorship to pharmacy staff in project pharmacies, focusing on aspects of good pharmacy practices, quality management, and good distribution practices.
- Acted as the focal point for pharmacovigilance in the region, overseeing the monitoring and reporting of adverse drug reactions.
- Successfully registered over 20 brands of drugs on behalf of MSF Pre-qualified distributors/suppliers in Kenya.

Jan 2007 to Apr 2010

Pharmacist: Ministry of Health - Kenya

- Worked as preceptor to provide practice-based instruction to ten students at pharmacy practice sites
- Interpreted hundreds of prescription orders, dispensed medications and counselled patients on drugs
- Reviewed hundreds of prescriptions to confirm appropriate selection of drug, dose and check for interactions with other medications
- Assisted patients in minimizing medical expenses by recommending generic alternative prescription medications in out-patient clinics
- Conducted cold chain monitoring and recording on daily basis whenever on duty
- Evaluated drug therapy to drive appropriate medicine use
- Participated in clinical ward rounds with senior colleagues and supervisors

EDUCATION

Jul 2021 to date

Master of Science

International Public Health

Liverpool Johns Moore University -Ongoing

Oct 2001 to Dec 2006

Bachelor of Pharmacy Degree

University of Nairobi - Nairobi – Kenya

Awarded Bachelor of Pharmacy degree

May 2016 to Apr 2017

Diploma in Supply Chain Management

ALISON – Online

Awarded Diploma in Supply Chain Management

Mar 1995 to Nov 1999

Kenya Certificate of Secondary Education

Misikhu Friends' Secondary School - Webuye – Kenya

Awarded Certificate with A- score

ACCOMPLISHEMENTS

- Supported the development of Supply Chain Strategic Plan, Pharmacovigilance Strategic Plan for Mombasa County
- Used Microsoft Excel to develop inventory tracking spreadsheets and monthly dashboards for commodity visibility
- Achieved over 99.7% reporting rates for commodities in partner-supported counties
- Reduced stock outs of family commodities in Kakamega, Kisumu and Vihiga to less than 5% in 2018-2019 financial year
- Revised full-set standard operating procedures in Nairobi, Mombasa, Kwale, Taita Taveta, Kiambu, Kirinyaga, Kisumu and Migori Counties
- Participated at the National-level in the review of ART guidelines and also reproductive health
